Independent auditor's report on review of interim financial information

To the Board of Directors of MSIG Insurance (Thailand) Public Company Limited

I have reviewed the accompanying statement of financial position of MSIG Insurance (Thailand) Public Company Limited as at 30 September 2026; the statements of comprehensive income for the three-month and nine-month periods ended 30 September 2026, changes in equity and cash flows for the nine-month period ended 30 September 2026, and the condensed notes ("interim financial information"). Management is responsible for the preparation and presentation of this interim financial information in accordance with Thai Accounting Standard 34, "Interim Financial Reporting". My responsibility is to express a conclusion on this interim financial information based on my review.

Scope of Review

I conducted my review in accordance with the Thai Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Thai Standards on Auditing and consequently does not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion.

Conclusion

Based on my review, nothing has come to my attention that causes me to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with Thai Accounting Standard 34, "Interim Financial Reporting"

Jedsada Le

The accompanying notes form an integral part of the interim financial statements.

These notes form an integral part of these interim financial statements.

The interim financial statements issued for Thai regulatory reporting purposes are prepared in the Thai language. These English language financial statements have been prepared from the Thai language statutory financial statements and were approved and authorised for issue by the Company's Board of Directors on 13 November 2026.

1 General information

The principal business of the Company is the operation of non-life insurance.

2 Basis of preparation of the interim financial statements

(a) Statement of compliance

The condensed interim financial statements are presented in the same format as the annual financial statements and prepared its notes to the interim financial statements on a condensed basis ("interim financial statements") in accordance with Thai Accounting Standard (TAS) No. 34 *Interim Financial Reporting,* guidelines promulgated by the Federation of Accounting Professions. In addition, the interim financial statements are prepared in accordance with the Notification of the Office of Insurance Commission regarding "Rules Procedures Conditions and Timing Period for Preparation and Submission of the Financial Statements of Non-Life insurance Companies" B.E. 2566, dated 8 February 2023.

The interim financial statements do not include all of the financial information required for annual financial statements but focus on new activities, events and circumstances to avoid repetition of information previously reported. Accordingly, these interim financial statements should be read in conjunction with the financial statements of the Company for the year ended 31 December 2025.

In addition, the Company calculates deferred tax assets for insurance contract liabilities in accordance with section 65 Ter for any other insurance set aside before the calculation of profit, but only the amount not exceeding 40% of the amount of insurance premiums received in an accounting period after deducting premiums for reinsurance.

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following items.

Items	*Measurement bases*
Investments measured at fair value through profit and loss, investments measured at fair value through other comprehensive income.	Fair value
Insurance and reinsurance contracts	Present value of fulfilment cashflows, Insurance service result and Risk adjustment
Defined benefit liability	Present value of the defined benefit obligation as explained

(c) Functional and presentation currency

The interim financial statements are presented in Thai Baht, which is the Company's functional currency. All financial statements presented in Thai Baht has been rounded to the nearest thousand unless otherwise stated.

(d) Use of judgements and estimates

The preparation of interim financial statements in conformity with TFRS requires management to make judgements, estimates and assumptions that affect the application of the Company's accounting policies. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Judgements, assumptions and estimation uncertainties

Information about judgements, assumptions and estimation that have the most significant effects on the amounts recognised in the financial statements or that have a significant risk of resulting in a material adjustment to the carrying amounts of assets or liabilities in the next financial statements is disclosed in:

Notes 4	- classification of financial assets: assessing the business model within which the assets are held and whether the contractual terms of the assets are solely payments of principal and interest (SPPI) on the principal amount outstanding.
Notes 5	- classification of insurance contracts and reinsurance contracts, assessing whether the contract transfers significant insurance risk and whether an insurance contract contains direct participation features; - level of aggregation of insurance and reinsurance contracts: identifying portfolios of contracts and determining groups of contracts that are onerous on initial recognition and those that have no significant possibility of becoming onerous subsequently; - measurement of insurance and reinsurance contracts: determining the techniques for estimating risk adjustments for non-financial risk.

Information about assumptions used in the measurement of insurance and reinsurance contracts in the following:

Insurance contract liabilities

The insurance contract liabilities of the Company comprise the liability for incurred claims and liability for remaining coverage. Liability for incurred claims (also referred to as "claim liabilities") consist of outstanding claims notified and outstanding claims incurred but not reported ("IBNR"), including risk adjustment while liability for remaining coverage (also referred to as "premium liabilities") consist of the unearned premium reserves, net of deferred acquisition costs, including any outstanding premium receivables.

The Company determines liability for incurred claims in accordance with the Company's claim experiences. The assumptions used in the estimation are intended to result in provisions which are sufficient to cover any liabilities arising out of insurance contracts to the extent that can be reasonably foreseen. However, because the uncertainty of a provision for insurance claims, it is likely that the final outcome could prove to be different from the estimated liability.

Provision is estimated at the reporting date for the expected ultimate cost of settlement of all claims incurred in respect of events up to that date, whether reported or not, together with related claims handling expenses. The Company uses several statistical methods to incorporate the various assumptions made in order to estimate the ultimate cost of claims.

The Chain Ladder technique involve the analysis of historical claim development factors and the selection of estimated development factors based on this historical claim development pattern. For later accident quarters where there is greater uncertainty, the Bornhuetter-Ferguson method, a combination of claims experience and loss ratio assumptions, is used.

The Bornhuetter-Ferguson method estimates the ultimate loss using a combination of actual reported losses and an estimate of loss developments for future losses which are based on the expected losses and the selected loss development factors of each accident year. The two estimates are combined using a formula that gives weight to the experience-based estimate as time passes.

The Best Estimate of the liability for remaining coverage has been calculated by applying a future loss and expense ratio to the accounted unearned premium reserve. The future loss ratio is set with reference to observed loss ratios, adjusted for the effect of recent changes to premium rates, underwriting terms and policy terms where applicable.

Discounting rate

All fulfilment cash flows relating to liability for incurred claims and liability for remaining coverage are discounted using selected yield curves. The Company uses the bottom-up approach for computation of discount rate consistent with the position taken by the general insurance industry. The bottom-up discount rate comprises of a risk-free discount rate and an illiquidity premium.

The Company determines risk-free discount rates using the government bond risk free yield curve. The government bond yield curves will be extracted from the relevant source, and linearly interpolated as necessary to reflect the required time intervals.

The Company has elected to not hold an illiquidity premium. General insurance contracts have very variable, unpredictable cashflows. Therefore, to generate a yield curve that reflects these cashflows would require a very liquid asset to be selected, so that it can be sold at any point in time in order to meet the liabilities. Given this, using government bond curves to derive the discount rate is an appropriate match for the cashflows in terms of both duration and timing.

	Portfolio Remaining Period as of 30 September 2026		
	1 Year	5 Years	10 Years
Insurance contracts and reinsurance contracts held	1.00%	1.80%	2.37%

	Portfolio Remaining Period as of 31 December 2025		
	1 Year	5 Years	10 Years
Insurance contracts and reinsurance contracts held	1.11%	1.28%	1.66%

Risk adjustment

The risk adjustment is determined in accordance with generally accepted actuarial methods including the Mack and bootstrapping methods. The risk adjustment takes into account the size and nature of the business.

Applying the confidence level technique at reserving class level, the Company estimates the probability distribution of the expected value of the future cash flows from insurance contracts at each reporting date and calculates the risk adjustment for non-financial risk at the 75th percentile (on both a gross and net of reinsurance basis) over the expected present value of future cash flows. A diversification factor is also applied to each class to allow for diversification benefits. The diversification factor will be selected on both a gross and net of reinsurance basis.

To determine the risk adjustments for non-financial risk for reinsurance contracts, the Company applies the confidence level technique on both gross and net of reinsurance and derives the amount of risk being transferred to the reinsurer as the difference between the two results.

14 Fair value measurement

Financial instruments measured at fair value

Carrying amount and fair values

The following table shows the fair values of financial assets and financial liabilities including their levels in the fair value hierarchy for financial instruments measured at fair value. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

	Carrying	Fair value			
At 30 September 2026	**amount**	Level 1	Level 2	Level 3	Total
			(in thousand Baht)		
Financial assets					
Government and state enterprise debt securities	3,533,123	-	3,533,123	-	3,533,123
Private debt securities	867,432	-	867,432	-	867,432
Unit trusts	3,938	-	3,938	-	3,938
Total	**4,404,493**	-	**4,404,493**	-	**4,404,493**

	Carrying	Fair value			
At 31 December 2025	**amount**	Level 1	Level 2	Level 3	Total
			(in thousand Baht)		
Financial assets					
Government and state enterprise debt securities	3,490,685	-	3,490,685	-	3,490,685
Private debt securities	743,042	-	743,042	-	743,042
Unit trusts	76,543	-	76,543	-	76,543
Total	**4,310,270**	-	**4,310,270**	-	**4,310,270**

Financial instruments not measured at fair value

The carrying amounts of the following financial assets and financial liabilities are considered to be approximate to their fair values: cash and cash equivalents, accrued investment income, other assets, and other liabilities.

The fair value of deposits at financial institutions which have remaining terms to maturity of less than 90 days and for those with remaining terms to maturity greater than 90 days, the fair value are based on carrying value.

15 Securities and assets pledged with the registrar

15.1 As at 30 September 2026 and 31 December 2025, the Company's investments were pledged with the registrar in accordance with the Non-Life Insurance Act No. 2 B.E. 2551 as follows:

	30 September 2026		31 December 2025	
	Book value	Face value	Book value	Face value
	(in thousand Baht)			
Bank of Thailand bond	15,463	15,000	15,751	15,000
Total	**15,463**	**15,000**	**15,751**	**15,000**

15.2 As at 30 September 2026 and 31 December 2025, the Company's investments in debt securities and deposit at banks were reserved with the registrar in accordance with the Notification of the Office of Insurance Commission regarding "Rates, Rules and Procedures for unearned premium reserve of Non-life Insurance Company B.E.2557" as follows:

	30 September 2026		31 December 2025	
	Book value	Face value	Book value	Face value
	(in thousand Baht)			
Government and Bank of Thailand bonds	567,668	554,000	640,374	614,000
Total	**567,668**	**554,000**	**640,374**	**614,000**

16 Restricted and collateral assets

	30 September 2026	31 December 2025
	(in thousand Baht)	
Deposit at bank - time deposit		
To secure bank guarantee - facilities issued by banks	**800**	**800**

17 Commitments with non-related parties

As at 30 September 2026 and 31 December 2025, the Company had future minimum lease payments required under these non-cancellable contracts as follows:

Commitments under office rental and service agreements

	30 September 2026	31 December 2025
	(in thousand Baht)	
Operating lease commitments		
Within one year	2,469	4,329
After one year but within five years	-	47
Total	**2,469**	**4,376**

18 Contingent liabilities

As at 30 September 2026, lawsuits have been brought against the Company, in relation to insurance claims of Baht 289 million *(31 December 2025: Baht 303 million)* whereas the sum insured of insurance policy and reinsurance claim recoverable of Baht 199 million and Baht 29 million, respectively *(31 December 2025: Baht 58 million and Baht 4 million, respectively)*. The Company's management believes that the claim reserves accounted for in the financial statements is adequate for potential losses in respect of those lawsuits.

19 Dividends

The dividends paid by the Company to the shareholders are as follows:

Annual dividend	Approval date	Payment schedule	Dividends rate per share *(Baht)*	Amount *(in million Baht)*
2026	22 April 2026	May 2026	40	57
2025	22 April 2025	May 2025	115	164

20 Thai Financial Reporting Standards (TFRS) not yet adopted

New and revised TFRS, which are relevant to the Company's operations and expected to have material impacts on the Company's financial statements when initially adopted, and will become effective for the financial statements in annual reporting periods beginning on or after 1 January of the following years and earlier application is permitted; however, the Company has not early adopted the new or amended accounting standards in preparing these interim financial statements.

TFRS	Topic	Effective
TFRS 7	Financial Instruments: Disclosures	2027
TFRS 9	Financial Instruments	2027
TFRS 18	Presentation and Disclosure in Financial Statements	2028
TAS 7	Statement of Cash Flows	2028

(a) Amendments to TFRS 9 Financial Instruments and TFRS 7 Financial Instruments: Disclosures

The new amendments are related to:

- recognition and derecognition, including accounting for settlement of financial liabilities using an electronic payments system; and
- assessing contractual cash flow characteristics of financial assets, including those with sustainability-linked features.

(b) TFRS 18 Presentation and Disclosure in Financial Statements

TFRS 18 will replace TAS 1 Presentation of Financial Statements and introduces the following key new requirements.

- Entities are required to classify all income and expenses into five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly defined operating profit subtotal. Entities' net profit will not change.
- Management-defined performance measures (MPMs) are disclosed in a single note in the financial statements.
- Enhanced guidance is provided on how to group information in the financial statements.

In addition, all entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method.

Management is currently considering the potential impact from these new and revised TFRS on the financial statements in the initial period adopted.
